

三家报价 一笔 CAW 付款

评委改价格或钱包，Pact 先拦。tx hash、拒绝码、allowed 十九、denied 一留在记录页。

Agent 要花钱，不能拿服务器私钥。

LOOSE KEY

服务器 key 太宽

一个采购 Agent 可以误付、超付，甚至把钱打到错误地址。

风险：钱先动，记录后补。

CAW PACT

Pact 先写好

链、代币、金额、地址和用途先写进 Pact，Agent 仍然能自己执行。

结果：放行和拒绝都能回看。

报价
改动
拦截

Compare vendor quotes, select the approved resource, attach existing live CAW payment proof, then mutate price or wallet address to verify the boundary.

Security audit resource procurement

RiskOps Agent can spend only inside this CAW Pact boundary.

🔍 Inspect run

Inline edit note: `judge order mutation`

Agent mission

Security-audit API/data package for today's treasury risk report

15-minute risk feed, vendor receipt, and CAW execution proof

CAW budget

0.002 SETH

CAW holds the agent wallet authority and limits chain, token, destination, and max amount.

Selected vendor

AuditMesh API

approved for CAW payment

📦 RiskOps Agent decision log

Compare quotes by SLA, risk score, price, and wallet allowlist.
Select the approved vendor that stays under the CAW Pact budget.
Request payment authority only for the selected destination and amount.

Judge attacks

▶ **Attach live CAW receipt**

⚠️ **Raise price above limit**

⊗ **Replace vendor wallet**

↺ **Restore approved order**

⚠️ **Order blocked before wallet authority**

Amount 0.005 SETH exceeds the pact cap of 0.002 SETH.

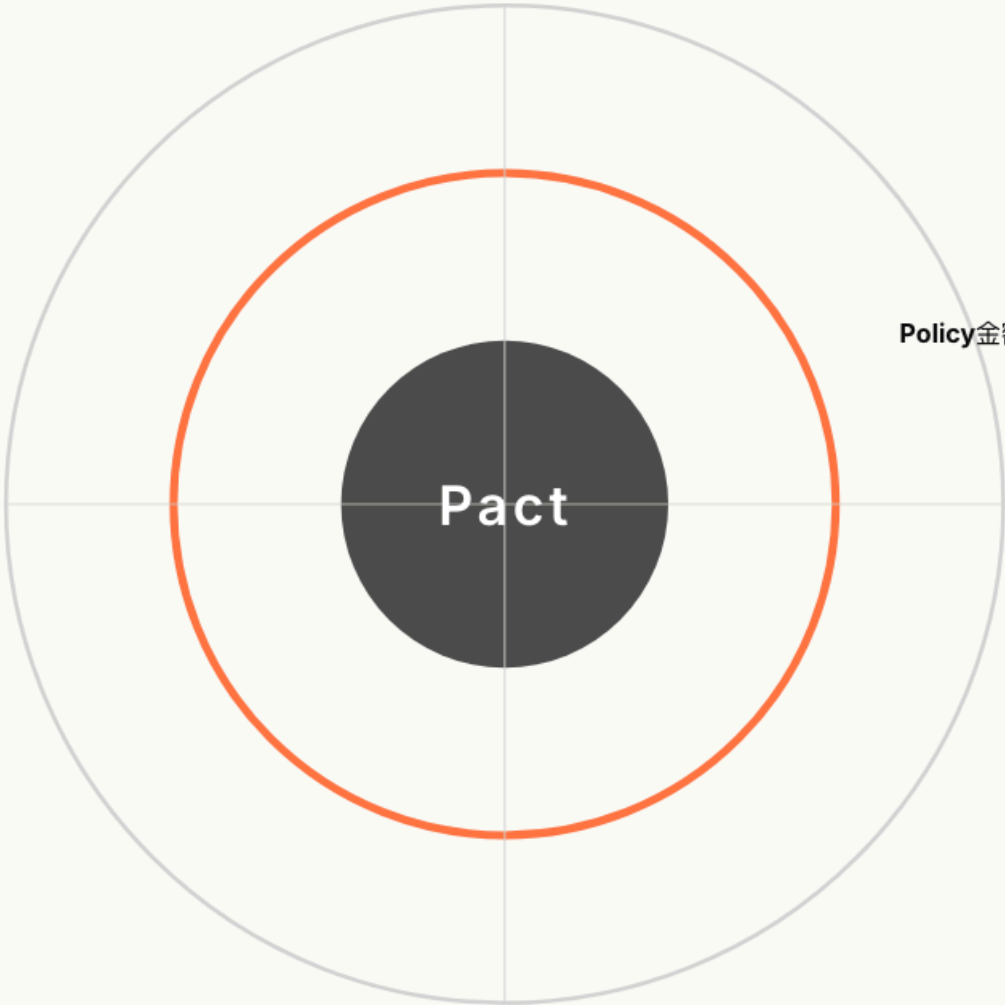

Agent 选择 AuditMesh。评委提高价格或替换钱包后，订单从可付款变成阻断。

THREE LAYERS

报价后面，还有付款范围。

前端提交采购单；policy 看金额、用途、地址和代币；CAW 只执行允许范围内的转账。

Intent 报价与评委改动

Policy 金额、地址、用途

CAWPact、转账、记录

REPLAY

改坏订单。 看CAW怎么 拦。

Pact、tx hash、拒绝码、allowed 十九、denied 一都放在记录页。

PACT	59f67ec0-8b3c-4d26-9403-0f70f083e3ec
TX	0xae5e ... c3e0ea
DENIED	ADDRESS_NOT_WHITELISTED
AUDIT	allowed=19, denied=1
